- 1) Participate in the scrum ceremonies to understand the stories/tasks and then liaise with the technical team toward implementation of the same.
- 2) Coordinate with QA and BA team to ensure the story's acceptance criteria is met.

Technology: ASP.NET 4.5, C#, Web API, Jira

Reason for Leaving: Though it was a C2H role post confirmation the location was not feasible. Due to customer requirements the phase 2 required on premise working.

IdeaPlunge LLC

Timeline: January 2019 to January 2020

Skype: live:deepak.vasudevan_1	deepak.vasudevan@outlook.com
Webex:	http://www.linkedin.com/in/lavanyadeepak
https://meet164.webex.com/meet/lavanyadeepak	https://lavanyadeepak.github.io/lavanyadeepak/

Role: Project Lead (Full Time till September 2019 and then Freelance Remote Consultant Role till January 2020)

Project: Mobotix Support Tools

Description:

A value-added component for their flagship product called Toolbox for Mobotix AG wherein rest of the applications can at ease manage their PDF documents like cobranding their respective sponsor identity, compress, implode and explode the document. Besides this the product had support for floor plan design and review to optimally place the surveillance device in the premises.

Roles and Responsibilities:

- 1) Participate in customer discussions and also in team agile meeting to coordinate in design and development of various components.
- 2) Ensuring the build and deployment of modules into customer environments for review.

Technology: .NET Core 2.2, Web API, MySQL, MongoDB

Reason for Leaving: IdeaPlunge shut its business post in January 2020.

SLK Global Solutions

Timeline: June 2018 to December 2019

Role: Development Manager

Project: Converge is a bouquet of enterprise applications powering SLK Intranet and Extranet towards accomplishing business objectives. One of the applications in Converge is Empower. Empower monitors the actual productivity and time spent by executives on the production floor. It helps view the operations holistically and identify opportunities for collaboration and optimization across the enterprise. It facilitates unlocking the full potential of the human capital and digital investments by identifying how teams spend time that impacts the customers and the enterprise.

Technology: WPF, Windows Services (in C#), SQL Server 2017, WebAPI

Reason for Leaving: Due to family commitments and reasons requiring extensive personal travel, I had to strike a balance by opting for freelance assignments.

HCL Technologies

Timeline: August 2016 to May 2018

Role: Solution Architect/Technical Manager

Project: Value Creation Portal

Skype: live:deepak.vasudevan_1

Webex:

<https://meet164.webex.com/meet/lavanyadeepak>

deepak.vasudevan@outlook.com

<http://www.linkedin.com/in/lavanyadeepak>

<https://lavanyadeepak.github.io/lavanyadeepak/>

Description:

1. Responsible for coordinating, managing, and supporting of Value Portal (Ideating Module) along with its siblings Enterprise Projects Quality Assurance tool and Power-Of-One community initiative.
2. Was also responsible for design of new extensions of the tool, architecting the prototypes and see through the engineering part of the module through its development phase to production.
3. Coordinated with respective business units in gathering the requirements and managing the delivery with the set of teams reporting to me for each application.
4. Create Project schedule, agreement, track project status and provide in-depth reports to engagement, management, and client team.
5. Effectively communicate project vision to team members and provide leadership cum mentoring to them.
6. Part of the design discussions in containerizing the modules and having them deployed to Azure.

Technology: ASP.NET 4.5, C#, WCF, Angular JS, NodeJS, Azure

Reason for Leaving: Due to family commitments and reasons requiring extensive personal travel, I had to strike a balance by opting for freelance assignments.

Syntel [Client: Allstate Insurance, Northbrook IL/Chennai, India]

Timeline: July 2014 to April 2015
